

Lubosz Dobrosław Karwat

Portrait - James Szych

Natural Stone

Size 38/42cm

Made according to the sketch of Francis Gypsy (Franciszka Cygana)

MC: Lubosz often uses natural stone in his work and is a master at creating texture and tone within the limited palette offered by these natural materials. Here though he has gone one stage further and only used white marble rods to describe this witty portrait. Using the direction of the square rods to create the entire is inspired...

which reminds me -

Marble is a valuable building material and should not be taken for granite.
